

Unitrends Cloud Backup for Office 365

Connected Continuity for Microsoft Office 365

Protect Exchange Online, SharePoint Online, and OneDrive for Business

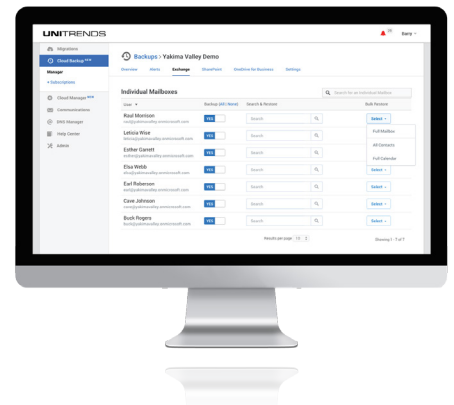

The no-sweat recovery plan for Office 365

- Automatic backup.
- Self-service recovery in seconds.
- Lost email restored in just a few clicks.
- Unlimited retention.
- Secure encryption.
- Easy set-up—nothing to install.
- Priced simply—per user per month.

Broaden your backup and recovery plan to include purpose-built protection for Microsoft Office 365.

Exchange Online, SharePoint Online, and OneDrive for Business are the applications your business relies on every day. But without a smart backup plan, finding and restoring lost Office 365 data can take hours or days. The Unitrends Connected Continuity Platform™ offers Unitrends Cloud Backup for Office 365, so you can recover lost emails, folders, contacts, and more in seconds.

No more panicking when a user deletes a file, just a quick recovery and back to business.

Office 365	How data loss can occur	Protect with Unitrends
 Microsoft Exchange	So much of your business takes places over email, but users can permanently delete critical data, whether accidentally or intentionally. Exchange purges deleted data after 14 to 30 days.	With Unitrends Cloud Backup for Office 365 you can recover lost email in seconds. Unitrends also protects Exchange folders, contacts, and entire mailboxes and accounts, which can't be done with Office 365 alone. Unlimited retention means you don't have to worry about backup size.
 SharePoint	Teams use SharePoint to circulate important files and project information. But SharePoint files can become corrupted, taking hours to rebuild before being usable again. And, SharePoint site admins can permanently delete their SharePoint data, making it immediately unrecoverable.	Unitrends Cloud Backup for Office 365 takes snapshots of your Office 365 environment 6 times a day. This means you can quickly restore files and entire sites, even if a user permanently deletes data. You can even rollback to a specific versions of files. All permissions and attributes will also be restored along with the data.
 OneDrive	Many Office 365 users save all of their files to OneDrive for Business. But users can also permanently delete data in their OneDrive account, making it immediately unrecoverable.	With Unitrends Cloud Backup for Office 365, automatic backup 6 times a day lets you go back and restore entire OneDrive datasets. Plus, unlimited retention means your data will be there when you need it.

Take advantage of Unitrends' intuitive platform for recovery. Forget searching through a Microsoft archive. Instead, just browse and select to restore an email, a folder, or an entire account.

The number one benefit of using Unitrends is that I get to sleep at night and not worry about my backups.

Unitrends' Continuity Solutions are backed by a global support team that consistently achieves a 98% satisfaction rating and are sold through a community of thousands of expert technology partners, service providers and resellers worldwide.

Office 365 Archiving

- **Unlimited retention:** No caps on data or storage. Priced simply per user per month on an annual contract.
- **Secure backup:** Unitrends uses per-contact AES-256 encryption, backed by RSA 2048-bit public private key certificates. User permissions are maintained by restoring data only to the original mailbox or site, preventing unauthorized access.
- **Industry's best RPO:** Unitrends Cloud Backup for Office 365 takes snapshots 6 times a day, so you can go about accessing Office 365 without any fear of disruption due to data loss.
- **Point-in-time roll back:** You can rollback to specific versions of SharePoint online files. All permissions and attributes will also be restored.
